Preamble: The NeuroFaith® Model

NeuroFaith® is an integrative model of human growth, healing, and transformation that brings together neuroscience, relational understanding, and faith-centered spiritual formation. It recognizes that meaningful change occurs through the integration of mind, body, and soul.

The NeuroFaith® model draws from established principles and frameworks, including Polyvagal-informed theory, HeartMath® / neurocardiology, and Internal Family Systems (IFS), integrated in alignment with spiritual formation. Within the context of coaching, these principles are applied in a supportive, educational, and growth-oriented manner.

The model is not intended for superficial use, but for meaningful engagement that supports personal development, relational awareness, and movement toward greater integration and well-being.

Scope of Certification

This certification authorizes the Coach to utilize the NeuroFaith® model within a coaching capacity only, consistent with the non-clinical nature of coaching.
